

Smart Payments = Smart Collections

Almost all patients have and prefer to use their mobile devices for all their transactions.

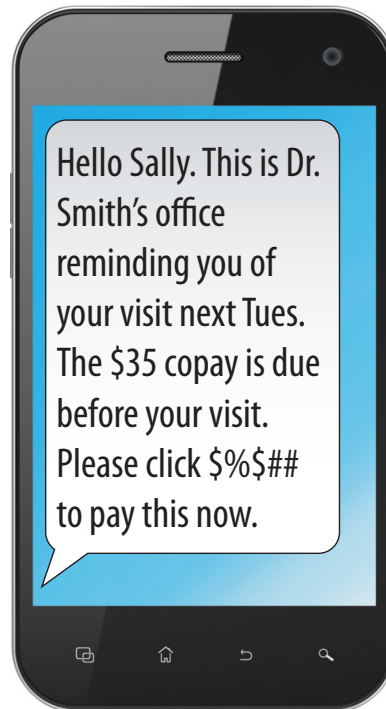

So let's make it easy and communicate with patients where they live!

Our automation software makes payments easier for your patients and collections easier for your staff. Using Artificial Intelligence combined with our affordable robust Texting solutions can virtually eliminate front desk payment anxiety for patients and for staff.

And patients who pre-pay their co-pays and deductibles are much less likely to miss their appointments!

We can combine the appointment information with the copay requirement—gently applied of course—in the notification text for an appointment reminder.

Let us help you get PAID FASTER!

- **Fast**
- **Easy**
- **Convenient**
- **Concise**

- Our AI verifies each copay and deductible in real time
- Our AI applies your rules for revenue cycle process
- Payments can go to your payment processor or ours
- AI will update patient EMR in near real time
- AI can verify or collect patient consents and update EMR
- Virtual Assistants/Digital Employees are available 24/7
- We require almost no IT Support to install and run
- AI can do countless tasks with ease — please ask us!
